Chapter 1: The Beginning with a Dream

Positive. The event for this chapter is: my birth in Hawaii with my mother dreaming a special dream.

I titled this chapter the beginning because this is the beginning of my life.

The significance is that my mom dreamed of a many deers drinking water from clear pools of water in a peaceful and tranquil landscape scene. This may be the feeling she got when I was birthed, and may be a prophecy of my life.

I'm incredibly blessed to have had such a good childhood and life. I feel that I am a tranquil person, who is going to lead many people to Christ.

Chapter 2: The First Trauma

Negative. When I was in 1st grade, I broke my left femur bone because of a rollerskating accident. I was determined to not be left behind my brother and I sped up and then fell. It wasn't so much the breaking of my leg that traumatized me - it just woke me up, which I think is a positive thing. Waking up and realizing that I'm alive and that this is life is a good experience - it helps me become aware and allow me to live my life meaningfully and purposefully.

But the problem was that I went under surgery and I couldn't see my mother for a while and I was traumatized by an intense pang of loneliness. This would stay with me even to this day.

Chapter 3: Drowning and Fear and Trauma

Negative. I tried to follow my brother again, and this time, I fell in the deep end of the pool. I came up coughing up water. I couldn't pull myself up - it was my mom who grabbed me

to save me. I would have died if I hadn't had help. I was helpless and learned fear and helplessness. Suffocation. I learned the feeling of death and nearly dying.

Chapter 3: The Excellent Dennis at Stanford University

Positive. Dennis played pool excellently at Stanford while he was having fun with the students. I was determined to focus and master the game, and within a few minutes, I became pro. I defeated everyone. I lost a couple of times, but I would hit the wall 3 times and make two bounces and get a ball in.

I also created a research AI project for my final project at Stanford.

I learned that I am excellent when I put my mind to it, and that I love AI.

Chapter 5: The Little Rock Star

Positive. I wanted to be a rock star. I would practice everyday hoping that one day I could perform. I researched and bought the perfect electric guitar and amp. Then I played all day everyday.

I learned that I can delve deep into a hobby and profession and become the best.

Chapter 6: Studying Well at Elite

Positive. Elite institute for SAT prep taught me how to study. It taught me how to survive in this world. I need to study and I need to survive. I learned how to get into the best colleges and live my life.

I learned that I can be intellectual and the best in the world in academics and all things.

Chapter 7: Beaten Up at Elite

Negative. This is actually what made me strong - I got beat up at Elite because I made fun of someone who was not as smart as me. This would eventually lead to my schizophrenia and the struggle with injustice in my life.

I learned that I need to forgive my enemies and that my suffering may actually change my enemy's life. I also learned how to be rugged and strong. Mentally messed up, yet ready for the complexity that lies ahead.

Chapter 8: Masturbation and Porn

Negative. My "friend" in school taught me how to masturbate and I got addicted to it. I learned that I need to heal and receive grace and mercy, even to this day.

Chapter 9: Bullied by Archie

Negative. Archie was my best friend, but he was also my biggest enemy. He bullied me - yelled at me and even physically fought with me. I learned that love can heal wounds and that friends will hurt each other, especially at a young age.

Chapter 10: The Outcast

Negative. I became a social outcast - and I enjoyed it to some degree. I would be the lone wolf sniper, and would think philosophically while everyone else is doing stupid things. I learned that I'm one in a million and that no one understands me or knows who I am. I also had social anxiety.

Chapter 11: Schizophrenia

Negative. I got schizophrenia and I struggled so much with it with different medication. I learned that I'm broken, but that God will use me powerfully.

Chapter 12: Bible Study with Sam Kang

Positive. I had a Bible study with a medical doctor, and I became intelligent. I went back to UCLA and became the best in the world at Computer Science.

Chapter 13: Christ Changes My Life

Positive. I heal from Schizophrenia through Christ, and I restore my relationship with my family through Christ, and I gain friends. I learn that God is good and powerful.

Chapter 14: Another Mentor - Richard E. Korf at UCLA

Positive. Professor Korf is a silent Christian, who mentored me in AI Computer Science. I learned how to think on my feet and make academics my own problem related particularly to me.

Chapter 15: Faith Evangelical Seminary

Positive. I learned that I can be a minister and that God can use me powerfully. I found my purpose and calling in life.

What I learned

I learned that I have so many positive things in my life. I was crushed when I was young - I had no purpose and no happiness. I struggled so much. But so blessed was I when I struggled against the pain to survive and maintain my integrity to do well in life. It is in this vague and obscure time and vulnerable time as a child when we are tested for life's purpose, and I passed

with flying colors. I know that the rest of my life has lots of meaning and purpose and that God will bless me immensely.

I can see that God will bless so many people through me, and that my wounds will heal many people.

My love of God is evident to all, and will make me a great leader in the name of Christ. My life is a testament to God's goodness, and the fruit abounds greatly, and all will see that Christ is in me and that God is good and that I am a good Christian.

Declaration

I declare I have read the entire Allender text.
